

Document AI: Digitize anything

Upstage Document AI is comprised of three solutions:

- **Layout Analyzer:** Extracts layouts, tables, and figures from any document.
- **Key Information Extractor:** Extracts key information from target documents.
- **Document OCR:** Extracts all text from any document.

In various enterprise use cases, Upstage Document AI resulted in **higher accuracy (95%-98% accuracy rate)** compared to previous manual human work for document processing. Due to its strong performance, the solution has been heavily adopted by various leading insurance providers, yielding significant productivity gains and operating cost reductions.
